# Pareo® Clinical

Powered by CAVO®

Enable a strategic shift to insourcing audits while mitigating provider abrasion with Pareo Clinical, an A.I.-enabled clinical management platform. Easily avoid overlap, access analytics and optimize resources seamlessly while maintaining full control of the process.

Increase auditor productivy 3x.

Learn More

Reduce Provider Friction
Automated medical records requests & overlap controls reduce provider abrasion.

Coordinate with Vendors
Seamlessly communicate with vendors to coordinate clinical audit activity and prevent overlaps.

Unlock Proven A.I.
Featuring OCR technology powered by machine learning to surface aberrancies without page-by-page review.

Internalize Clinical Analytics
Access expert clinical analytics & validate within Pareo Clinical to power internal teams.

Take Control of Your Clinical Audit Strategy: A.I.-powered platform maximizes auditor efficiency

Insourcing clinical audits allows payers to trim costs, gain transparency, and reduce provider abrasion.

The complex workflow and analytics capabilities of Pareo Clinical maximize the effectiveness of internal auditors.

Pareo Clinical's native CAVO integration incorporates specialized clinical audits such as IB Reviews and DRGs. Automated medical record requests and transparent coordination mitigates provider abrasion.

Automate
Automate custom workflows and validation protocols, including the issuing of medical records requests.

Digitize
Digitize clinical content to create a robust database of claims & documentation to enhance clinical auditor analysis.

Integrate
Unlock previously unreadable text from clinical documentation, transforming it into usable data to greatly enhance auditor effectiveness. Connect directly with electronic health records.

Report
Create reports by content type, age of requests by provider, inventory by status, and more.
