# Streamline Operations and Reduce Costs **with Pareo®**

Pareo® is the industry's first and most widely used Payment Integrity technology operating platform. It's not just another point solution. It's a game-changer for scaling claims payment accuracy strategies. Pareo integrates all claim audit activity in one place – automating manual work, eliminating infrastructure overhead, and reducing IT expense. All while enhancing relationships with vendors, providers, and internal teams.

Administrative complexity costs payment integrity leaders $265B annually.*

Payment Integrity leaders are tasked with driving more results with fewer resources year after year. But complex operations and duplicative, manual processes limit your ability to scale your program. Pareo offers a better way to manage claims payment accuracy.

From Complexity to Clarity

Data is everywhere and nowhere

Manage Outcomes – Not Vendors

Never access a vendor portal again. Pareo lets you manage all your vendors from one platform. Review, manage and report on valuable metrics across your vendor stack.

Insource More Claim Audit Work

Your team can work up to 3x faster with workflow automation and an intuitive UI that offers rich context for quickly validating findings.

Expand Cost Avoidance Initiatives

See leakage, error trends, and other insights that allow you to expand prepay programming. Integrate prepay vendors, automatically orchestrate data, and manage the claim review process.

From Complexity to Clarity with Pareo®

ClarisHealth

Do More with Your Data

By addressing the administrative complexity, limited visibility into vendor performance, and difficulties internalizing more audit work, Pareo is driving payment integrity forward.
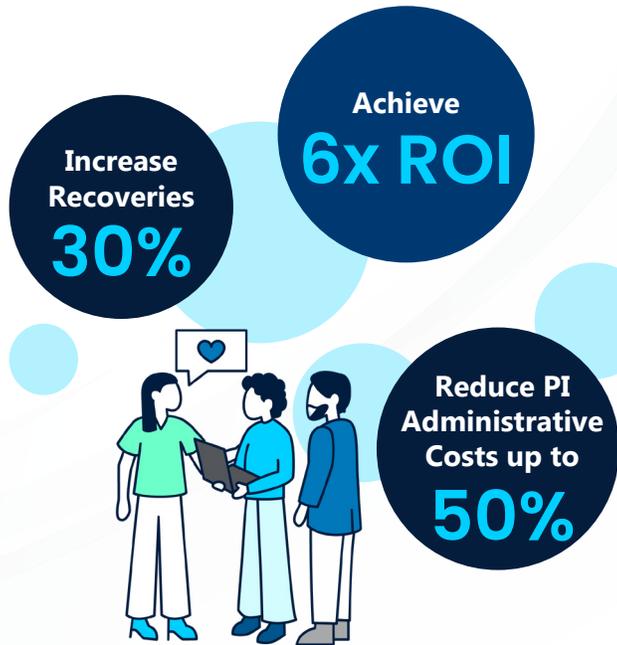

Insights That Accelerate Your Strategy

Configurable dashboards and reports give you timely insights into operational, vendor, audit and team KPI's so you can drive improvements when – and where – they're needed most.

Reduce the Cost of Data Management

Pareo integrates with claims adjudication and other data systems to offer claim inventory controls, including global exclusions and automated audit overlap management.

Drive Efficiency at Scale

An enterprise platform allows you to simplify your technology stack and scale operations more efficiently. Payers, on average, triple their medical savings with this approach.

Why ClarisHealth?

ClarisHealth was founded in 2013 with the understanding that the way payment integrity has historically operated has remained the same for 20+ years. We set out to put health plans in control over their payment integrity operations by offering an enterprise technology platform, Pareo.

Pareo brings together the people, processes, and content powering your program. Today, our AI-enabled payment accuracy solutions empower innovative cost-containment strategies at leading health plans.

How can a total payment integrity platform empower your health plan?

See for yourself the value that Pareo can bring to your organization. Request a demonstration or an ROI analysis today.
